

Subject	Instructions	Work Options
Art	Research into still life artwork. Look at different artist. What do you think about the work? What mediums have they used? How do they layout the objects in the still life? Research different objects which are used in still life. Create your own still life from objects that mean something to you. Think back to the lesson about sense of place; add objects which tell the viewer a story about you. Draw the still life using pencil. Watch the video how to add tone and shading to 3d shape. Add colour using different techniques from link 4.	https://www.tate.org.uk/art/art-terms/s/still-life https://www.art-is-fun.com/still-life-objects https://www.youtube.com/watch?v=DCyJ1LMTzrk https://www.art-is-fun.com/colored-pencil-instruction
Computer Studies	In this term, you will be learning what makes a computer, its components, how it has evolve and the basic functioning of a computer. The lessons are still available after clicking 'Continue' on the error message. Lesson 1: Get into Gear. In this lesson, you will focus on what sets computing systems apart from other purpose-built machinery: it is their ability to execute programs that allows them to modify their operation and perform different tasks, and becoming our most versatile 'tool for thought'. Complete task 1 Antikythera mechanism, task 2 your software and your programs, task 3 the intelligent piece of paper, and then the end of lesson quiz. Lesson 2: Under the Hood. In this lesson, you will investigate how all computing systems make use of the same components: a processor, memory, storage, input and output devices, and communication components. You will start with the introductory quiz, and then follow the tasks. Complete task 1 Check the specs and fill in the table, then task 1 (continued) similar components, task 2 wearable computing, and then the end of lesson quiz.
